Art Unit: 3765

This application is in condition for allowance except for the following formal matters:

The drawings are objected to because an arrow in Figure 1 between box 6 and box 7 has been omitted. Providing an arrow between box 6 and box 7 in Fig. 1 is deemed necessary so as to be consistent with the specification which states that data combining device 6 forms a pattern list and that image treating device 7 is provided to treat an image of combined patterns in accordance with the pattern list so that the treated image of patterns may be indicated at the pattern indicating device 8. In order for the image treating device 7 to treat an image of combined patterns in accordance with the pattern list formed by the data combining device 6 the image treating device 7 must have access to that pattern list. Therefore an arrow must extend from data combining device 6 which forms the pattern list to image treating device 7 so as to provide the data that constitutes said pattern list.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The disclosure is objected to because of the following informalities:

The specification contains minor errors in grammar and syntax. On page 1, line 19 of the specification, after "movement of", --a-- should be inserted; on page 1, line 21, "these are" should be changed to --being--; on page 4, line 12, after "4", --is-- should be inserted; on page 5, line 26, "is" should be deleted; on page 6, line 2,

Art Unit: 3765

"patterns" should be changed to --pattern--; on page 6, line 9, after "of", --a-- should be inserted.

Claims 2,4, and 6-8 contain minor errors in grammar and syntax. In claim 2, line 3, "being" should be deleted. The same change should be made in claim 6, line 3. In claim 4, line 4, "arrange" should be changed to --arranging--; in claim 4, line 9, "the" should be deleted. In claim 7, line 3, "of," should be changed to --of:--. In claim 8, line 6, "patter" should be changed to --pattern--.

Appropriate correction is required.

The following is an examiner's statement of reasons for allowance:

Claim 1 and its dependent claims are allowed because claim 1 specifically requires a sewing machine for stitching optionally selected patterns in accordance with pattern data, the sewing machine comprising a means for giving indication data for said pattern data, a means for arranging indication data for pattern data in accordance with a combination of said pattern data, and a means for designating an initial one of the pattern data indicated at said indicating means.

Claim 4 and its dependent claims are allowed because claim 4 specifically requires a sewing machine for stitching optionally selected patterns in series in accordance with pattern data, the sewing machine comprising a means for discriminating whether or not pattern data indicated is identical with preceding pattern data, and a means for treating the stitch end point of indication data for said preceding pattern data so that said stitch end point may be indicated in series at said pattern indicating means as the stitch start point of the indication data for the next pattern data,

Art Unit: 3765

in case said preceding pattern data is discriminated as identical with said next pattern data.

Claim 7 and its dependent claim are allowed because claim 7 specifically requires an indicating method of a sewing machine for stitching a plurality of patterns in series in accordance with pattern data, said indicating method comprising the steps of: discriminating whether or not the pattern data of linearly combined pattern data is identical with preceding pattern data, and treating images of the patterns to be indicated in a manner that the stitch end point of the indication data corresponding to said preceding pattern data may be a stitch start point of the indication data corresponding to the next pattern data, in case said preceding pattern data is discriminated identical with the next pattern data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The patent to Skogward is cited to disclose a sewing machine for stitching optionally selected patterns in accordance with pattern data, the sewing machine comprising: a device 12, Fig. 2 for giving indication data for said pattern data, a device 15 for arranging said indication data in accordance with a combination of said pattern data, and a device for indicating said indication data (see the display shown in Fig. 3).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.
